The Problem

This company had 4 treatment tanks (125,000 sq ft per tank) and their associated walkways that were deteriorating. They were looking for a cost-effective solution to protect their equipment investment.

The Solution

Thortex Chemi-Tech EP and **Thortex Floor-Tech RS** were the products chosen for this job.

Thortex Floor-Tech RS is a unique re-surfacing system which provides excellent long-term protection even in the most aggressive environments.

Thortex Chemi-Tech EP is a two component, solvent-free, epoxy coating designed for use as an economical, heavy-duty, chemical-resistant lining system for concrete and metal structures. It offers a high degree of resistance to attack by aqueous chemicals and is ideal for tanks, containment dykes, and sewage treatment equipment.
