

Project Profile Internal Wall Refurbishment

The Problem

This factory was used as a food processing and preparation plant. It was important to bring all of the internal wall surfaces up to the required hygienic standards.

The Solution

The Thortex Wall-Tech UV coating system was specified to protect all the internal wall surfaces. Wall-Tech UV meets USDA requirements for incidental food contact and FDA requirements for direct food contact. One coat of Uni-Tech GP Primer and two coats of Wall-Tech UV were then applied.
