

## Profile: Protection of Metal Storage Tanks

### The Problem

These bulk storage tanks were severely damaged by corrosion. The structural integrity of the tanks were threatened by the corrosion. Immediate repairs were required to prolong the service life of the tanks in question.

### The Solution

The tanks were dismantled and blasted to remove all surface contamination. **Thortex Uni-Tech MC Primer** followed by two coats of **Thortex Uni-Tech UV** were applied to the entire surface by spray application to provide long-term protection.

**Thortex Uni-Tech MC Primer** is a high-performance, anti-corrosive epoxy coating designed for use as a universal primer on a wide range of surfaces including concrete and metal.

**Thortex Uni-Tech UV** is a high-performance system specially developed for the long-term cosmetic protection of all types of structures.
